

# take care health systems<sup>SM</sup>

a *Walgreens* Health and Wellness Company

## Introducing Complete Care and Well-Being —

- A one-of-a-kind, integrated healthcare solution developed by Walgreens and Take Care Health Systems that allows employers to take care of their employee populations, including dependents and retirees, at the workplace and in the community.
- Builds on the strong foundation of employer-sponsored health and wellness centers operated by Take Care Health Employer Solutions and integrates them with the in-store Take Care Clinics and the extensive Walgreens national pharmacy network.
- Answers the question, “How do we manage our costs and improve our employees’ health at the same time?”

## The Benefits of Complete Care and Well-Being

Complete Care and Well-Being provides a comprehensive, high-quality, integrated healthcare solution that is simple to understand and affordable across a host of care settings. It will produce:

- o Better health outcomes
- o Greater patient satisfaction
- o Lower employer healthcare costs
- o Increased compliance through convenience, clinician interaction and systems integration, and
- o Greater employee productivity.

## An New Approach to Managing Health and Wellness While Holding Costs in Check

*New Pharmacy Pricing* – A new pharmacy pricing component that gives favorable and easily understood pricing for both proximate employees via an on-site pharmacy and non-proximate employee populations – including dependents and retirees – via Walgreens extensive nationwide retail network – the neighborhood Walgreens store.

*Options for Companies Considering New On-Site Pharmacies* – Companies that already have an on-site health center or pharmacy, or those who are considering an on-site health center and/or pharmacy will be able to enjoy all of the benefits of Complete Care and Well-Being.

In addition to nationwide discount prescription pricing whether on-site or at retail Walgreens location, we’re also offering two options for new on-site pharmacies –

- o Companies can build the pharmacy and fund the operating costs to receive the most optimal pricing, or;
- o We can build the pharmacy and fund the operating costs for companies; however, you will still enjoy remarkably better pricing for all prescription needs.

*Incentives to Help Drive Employee Engagement* – Employers who participate in Complete Care and Well-Being may also be able to offer a reduced copayment to employees who use the worksite pharmacy or any Walgreens pharmacy. These potential incentives will increase employee engagement and utilization, helping to further reduce an employer’s costs.

*Even More Choices for Care* – As we work to refine and enhance Complete Care and Well-Being with upgrades to our clinical technologies and seamless linkages between our worksite health centers and Take Care Clinics located at select Walgreens stores, employers and their employee populations will have even more options for high-quality, convenient healthcare.
